# L'AZIENDA

## THE COMPANY

**Unizip** nasce a Modena nel 1995 e diviene in pochi anni un punto di riferimento importante sul mercato italiano per i maggiori produttori del settore moda.

L'azienda amplia ben presto la sua offerta produttiva con un'attenzione particolare alle ultime tendenze ed innovazioni, proponendo una gamma completa di chiusure lampo in molteplici varianti e tecnologie.

Grazie alla forte sinergia con i propri clienti, Unizip è in grado di offrire un ottimo Customer Service in termini di creatività, know-how e servizio post-vendita. La possibilità di personalizzare il prodotto secondo il gusto del cliente rende ciascun articolo unico e raffinato.

Nel corso degli anni Unizip evolve la sua organizzazione seguendo gli sviluppi del mercato della moda e dell'economia mondiale, fino alla fondazione di Unizip Shanghai e Unizip Hong Kong, innovativi poli di produzione e supporto nelle aree dell'estremo Oriente, oltre allo Showroom di New York.

Oggi il Gruppo Unizip è in grado di servire i suoi clienti in tutto il mondo mantenendo la qualità ed il servizio di sempre: tutto ciò rende Unizip orgogliosa del proprio lavoro, fondato sull'innovazione e sulla soddisfazione del cliente.

*Unizip was founded in Modena in 1995 and became quickly one of the most known companies of its segment all over the Italian fashion industry.*

*The company has soon expanded its offerings and capitalized on innovation, technologies and market trends, proposing a full range of zip fasteners in many variants.*

*Its strong synergy with the customers allows Unizip to offer a high quality support in terms of creativity, know-how and after-sales service. The ability to customize the offer according to the customers' requests makes every product looking unique and refined.*

*Over the years Unizip has constantly adapted its structure to the fashion market changes and the economic developments, until establishing Unizip Shanghai and Unizip Hong Kong as support production plants in the Far-East areas, as well as New York Showroom.*

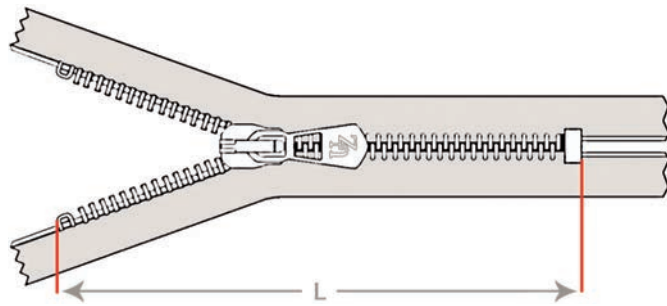

*Nowadays the Unizip Group is able to serve its customers all over the world, keeping quality and service on a higher level: all this makes Unizip proud of its work, based on innovation and customers' satisfaction.*

**Fissa · Close End**

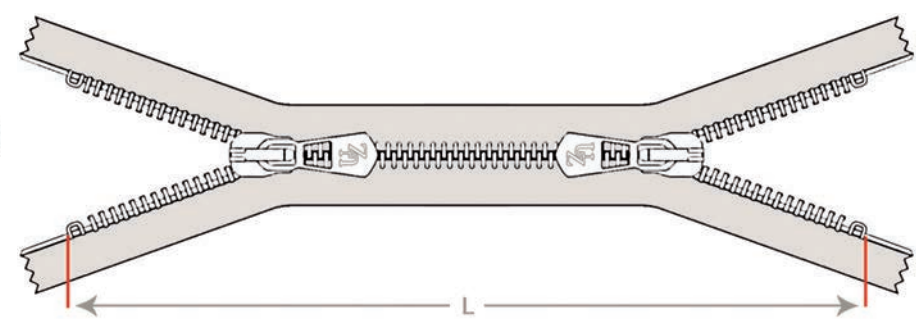

**Divisibile · Open End**

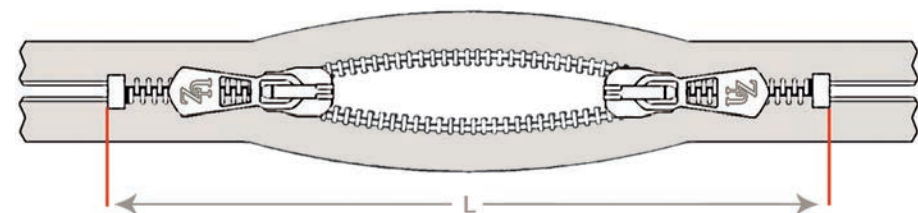

**Divisibile comby · Two-Ways Open End**

**Fissa doppio cursore a X · Close End X-Type**

**Fissa doppio cursore al centro · Close End O-Type**

L = Lunghezza della zip  
L = Length of the zip

A close-up photograph of a zipper chain and puller. The zipper chain is made of a series of small, interlocking metal teeth, and the puller is a large, rectangular metal piece with a hole in the center. The zipper is set against a light-colored fabric background. The lighting is soft, highlighting the texture of the fabric and the metallic sheen of the zipper components.

Unizip

# CATENE

## CHAINS

Materiali classici come l'ottone ed altri assolutamente innovativi, coniugati ad una molteplicità di galvaniche e verniciature, permettono di innovare costantemente la chiusura lampo di metallo o sintetica, a partire dalla sua componente principale: la catena.

*Classic materials such as brass and other highly innovative ones, connected to a variety of plating and painting colors, allow to bring more and more innovation on metal, plastic and polyester zip, starting from its main component: the chain.*

# LA QUALITA' DI SEMPRE

NEW SHAPES, SAME QUALITY

**Unzip** offre un assaggio delle potenzialità della stampa 3D applicata al mondo della moda. Tecnologie di nuova concezione permettono di creare prototipi in resina polimerica finalizzati a mostrare al cliente, in anteprima e in tempi rapidi, campioni in essere del tutto realistici. I modelli personalizzati consentono una verifica completa e puntuale al cliente prima del lancio di produzione.

*Unzip offers a taste of the 3D printing potential applied to the fashion world. Newly developed technologies allow to create prototypes in polymer resin, aiming to quickly show a customized and fully reliable sample preview to the customer. This allows to get a complete and accurate check before production launch.*
